

The CK31ex eliminates the need for multiple devices and substantially reduces total cost of ownership.

With the CK31ex, users can scan 1D, 2D, composite and postal codes; capture images, signatures and documents; read at near and far distances; and successfully cope with damaged, poorly printed or partially obscured codes in variable lighting conditions.

Available with factory-loaded Terminal Emulation support, the feature-rich CK31ex meets a variety of needs, from users on the manufacturing line who scan small 2D bar codes, all the way to those in the warehouse that need to scan large, linear bar codes on the fourth tier of the pallet racking. Multiple keyboard options and a user-installable pistol grip handle also provide application flexibility.

With the CK31ex, companies can standardize their training, support and maintenance, substantially reducing total cost of ownership.

The CK31ex positions your enterprise for the future with a combination of best-in-class features and functionality that enhance mobile data collection such as simplified setup menus and display icons to provide intuitive, graphic-based status information.

Web-based applications can easily be implemented with Microsoft Internet Explorer or Intermec's browsers.

The CK31ex incorporates all the leading industrial mobile computing technologies – Microsoft Windows CE.NET operating system, 802.11 b/g, Intel XScale processor, integrated scanning, and USB to deliver the optimum combination of real time operation and throughput required for real time, mission-critical applications in warehousing and distribution or store operations.

DISCOVER A WHOLE NEW WORLD OF SCANNING

DISCOVER THE ADDED VALUE OF SCANSOURCE

ScanSource is a distributor of specialty technologies. In Europe we distribute auto data collection products (like barcoding) and point of sales systems (like retail and restaurant checkout systems). We sell only to resellers and add value by providing technical support, professional services, and financial flexibility.

- Your partner, never your competitor
- One of the largest inventories in Europe
- Financial services
- One stop shop
- Web catalogue and 24/7 ordering
- Pre- and post-sales support
- Highly trained sales representatives
- Educational programmes

Ask your sales representative to sign you up for our online catalogue. Find out more at www.scansource.com/europe

“IT’S SCANNING, BUT NOT AS WE KNOW IT”

A-0005EN

AIM STRAIGHT WITH THE NEW CK31 EX25

The rugged CK31ex mobile computer delivers the ultimate in warehouse productivity. By integrating breakthrough EX25 auto-focus area imaging technology, the CK31ex enables users to quickly scan any type of bar code, in any orientation, from 15cm to 15m away, opening up new efficiencies and application opportunities across the warehouse.

With omni-directional scanning, laser pointer auto-determining illumination and centered decoding, the CK31ex makes it easy to scan at variable distances, lighting conditions and angles, improving worker productivity and accuracy. In addition, the CK31ex touch screen, with full quarter VGA resolution, can be read in a variety of indoor and outdoor conditions.

- A rugged, reliable computing, thoughtful ergonomic design and high throughput.
- The CK31 with EX25 area imager is now available for order, a breakthrough that transcends the boundaries of traditional imaging technology.
- Now, you need just one device for all your scanning needs – the EX25 Near and Far 2D Imager Engine.

The CK31 with the EX25 Near and Far 2D Imager Engine's features and capabilities opens a world of new opportunities in the world of bar code scanning. Breakthrough auto focus technology enables users to scan items from as close as 15cm to as far away as 15m in any orientation.

REVOLUTIONARY INTERMEC EX25 SCAN ENGINE USES AREA IMAGING TECHNOLOGY TO SCAN WIDE RANGE OF BAR CODES IN ANY ORIENTATION FROM 15CM TO 15M

- First near-far scan engine to read 1D, 2D, composite and postal codes, eliminating need for multiple scanners
- First near-far scan engine to read bar codes in any orientation
- Imaging capabilities capture photos of damaged, expired or unsealed goods and proof-of-delivery documents

The EX25 can read and decode bar codes in any orientation, so workers don't need to twist their wrists or the object being scanned to capture the data, saving time and reducing fatigue and injury. It is capable of reading and decoding 2D bar codes as small as 4mm, which are common in electronics manufacturing.

A special lighting system allows the EX25 to easily read 1D and 2D bar codes in total darkness. Because it can read 1D and 2D bar codes printed on normal, non-reflective paper labels at long range, there is no need to purchase special media for shelf labels, which can be as much as 10 times more expensive. And its unprecedented small size allows it to be integrated into devices that could never accommodate larger, near-far laser-based scan engines.

The new Intermec SR61 cordless scanner, which also integrates the new EX25 engine, will be available from ScanSource Europe from the third quarter of 2007. Call your sales representative for delivery dates.

SERIAL SCANNER
Play our Serial Scanner game and test out the new CK31. We're offering a Bluetooth headset to the highest scorers. www.scansource.com/europe/intermec/ex25

Now try a CK31 with EX25 demo unit at 65% discount*

Terminal Unit Part Numbers	Description
INT-CK31CB114M002803	EX25 VT/ANS 52KY No Bluetooth
INT-CK31CB113M402803	EX25 5250 52KY Bluetooth
INT-CK31CB123M002803	EX25 VT/ANSI 42KY No Bluetooth
INT-CK31CB123M402803	EX25 VT/ANSI 42KY Bluetooth
Handle Part Numbers	Description
INT-203754001	Pistol grip handle with trigger K30/CK31

For more information please call the free phone number on the back to get in contact with your ScanSource Europe sales representative. *One demo unit per company. Demo discount is not applicable for accessories.

TEST THE EX25 FOR YOURSELF – AND PROVE YOU CAN BE A SERIAL SCANNER
Don't forget you have a great opportunity to win a Bluetooth headset with ScanSource Europe and Intermec. Play our Serial Scanner game at www.scansource.com/europe/intermec/ex25.
