PF8 printers, available in direct thermal (PF8d) or thermal transfer (PF8t) versions, offer compact size, sturdiness, and silent operation, perfect for a variety of applications in retail, office, service industry and healthcare settings.

## PF8d

*Direct thermal only (no ribbon)*

With the smallest footprint of any Intermec fixed position printer, the PF8d is ideal for space restricted applications requiring less than 1000 labels per day.

The direct thermal printer delivers clean, crisp barcodes on tags, tickets and labels. A real-time clock, a standard feature on this model, enables time stamping of the media as it prints.

## PF8t

*Thermal transfer (ribbon)*

Slightly larger than the PF8d, the PF8t thermal transfer printer is able to accommodate very large ribbon rolls (300m / 11,800 inches) for a printer in its class. This eliminates frequent ribbon changes and downtime. The PF8t also accepts a compact flash card to expand its memory by 1GB.

- Small footprint, ideal for space restricted applications.
- User-friendly design makes it quick and easy to setup and re-load supplies when needed.
- Large capacity media rolls, large label width.
- 200 dpi for direct thermal and choice of 200 or 300 dpi for thermal transfer.
- Smooth migration from PC4, full compatibility in protocols or software.
- Most common interfaces supported: Ethernet (thru EasyLAN 100e), USB 2.0, Parallel and Serial.
- Connect to Print for easy set up.
- High throughput with print speeds up to 4 inches per second.
