

# HIT IT WITH ONE OF OUR EX25 SCANNERS

Our revolutionary Intermec Intellibeam EX25 scan engine uses area imaging technology. That means it can scan any barcode, from any distance.

- It reads 1D, 2D, composite codes and postal codes.
- It scans from any distance
- It scans upside down and in all angles.
- It takes pictures. Handy for damaged, expired or unsealed goods and proof-of-delivery documents.

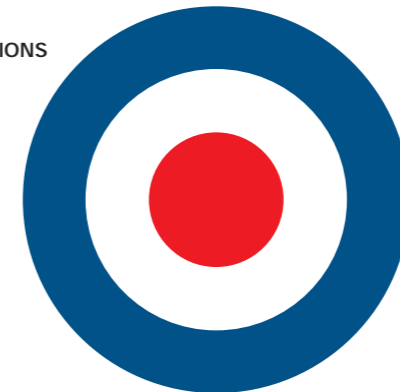

Whatever your target is.  
Our EX25 scanners will hit it.

CK31EX

INTERMEC NOW INTRODUCES THE **CK31EX** RUGGED HANDHELD COMPUTER, THE FIRST PDA AVAILABLE WITH A CHOICE OF ALL INTERMEC SCANNING OPTIONS: STANDARD RANGE AREA IMAGER, MEMS LASER SCANNING OR LINEAR SCANNING. THE CK31EX ALLOWS COMPANIES TO STANDARDISE ON A SINGLE FORM FACTOR AND CHOOSE THE SCANNING TECHNOLOGY THAT BEST SUITS THEIR APPLICATION NEEDS, FROM LOW-LIGHT ENVIRONMENTS TO HIGHLY DENSE OR DIFFICULT TO READ BAR CODES.

- The Intermec® CK31EX mobile data collection terminal continues the tradition of delivering on Intermec's promise of rugged, reliable computing, thoughtful ergonomic design and high throughput.
- The CK31EX with EX25 area imager is now available for order, a breakthrough that transcends the boundaries of traditional imaging technology. The EX25 is capable of scanning 1D and 2D barcodes from as close as 6 inches to as far as 50 feet, in any orientation.
- CK31EX with EX25 imager enables users to document on the spot, proof of delivery, damaged goods or merchandise. Now, you need just one device for all your scanning needs – the EX25 Near and Far 2D Imager Engine.

Intermec's **SR61** handheld cordless scanner incorporates the flexibility and rugged design of a handheld scanner with the seamless functionality of wireless communication.

The SR61 features a personal area network (PAN) radio based on Bluetooth™ communication protocol, making scanning easier and safer with no costly cables to damage or become entangled. Users gain hassle-free mobility up to 30 meters (100 feet) from the host.

**SR61**

With **multiple scan options**, including linear, area and standard range laser, the SR61 allows users to configure the scanner to meet the specific needs of their environment, whether they include reading specific bar code symbologies, decoding poor quality or damaged bar codes with ease or utilize image capture for proof of delivery and point of service applications.

With **the ability to interface with Intermec**, computer products including the 700 Series, CK30, CK31EX, CK60 and CV60, the SR61 cordless scanner increases productivity while keeping costs down. Users can connect to one Intermec host device enabling multiple people to scan items for inventory management, picking, shipping and receiving, cross docking, work-in-process, tool crib, and pallet tracking, all with ease.

The SR61 includes Intermec's **EasySet™ software** setup tool for easy configuration and personalisation. The user can quickly set security options, select beeper tones and volumes, good read and error read responses, and many other customisations.

**INTERMEC'S CK61 MOBILE COMPUTER IS AN ULTRA-RUGGED DEVICE. IT PROVIDES EVERYTHING DEMANDED BY THE TOUGH ROUTE ENVIRONMENT.**

Battery capacity to work all day long. Rugged design to provide years of reliable service. Next generation processor and operating system to run complex application software. Non-volatile storage to protect data. The CK61 works in the most demanding environments and will provide years of reliable service.

**CK61**

**User Interface**

The QVGA touchscreen allows the CK61 to run both text-based applications and graphical interfaces. Mobile workers are able to quickly enter large amounts of data using the large numeric keypad with easy-to-use keys and excellent tactile feel. Suitable for both one- and two-handed input, the keypad is designed to last the life of the unit.

**Compatibility and Flexibility**

The CK61 is available with either Windows CE or Windows Mobile software for Pocket PC. Windows CE provides significant flexibility to those customers who wish to control the user experience.

**Data Storage**

Onboard non-volatile memory called Persistent Storage, an exclusive feature of the CK61, preserves applications and databases even if the batteries become depleted. The CK61 also offers an SDIO card slot supporting removable Storage Cards, which allows easy recovery of data from a damaged unit or even more onboard capacity for large databases.

**Rugged Design**

The CK61 utilizes a magnesium top cover and tough rubber bumpers at each corner to achieve extremely rugged environmental specifications. The case is sealed against water and dust to IP64 standards to ensure years of trouble-free service.

- Drop survival: Multiple 1.8 m (6 ft.) drops to steel or concrete
- Operating temp.: -20°C to +50°C
