

Product Communication

Type: EMEA Product Announcement
Number: EMEA-PM08-031
Date: September 10th , 2008
Subject: CN3, CN3e Holders for 6820/21 Printers Now Shipping

The 682x Mobile Full Page Printer Series continues to be one of the most versatile solutions on the market. The real time accounting structure provided by the 682x printers and Intermec handheld computers facilitates route delivery settlement and ensures customer information is always current. Customers have the choice of portable and fixed mount configurations depending on mobility requirements.

This Product Announcement introduces several additional enhancements to the 682x family to improve the overall value proposition of the solution.

Intermec is pleased to announce that holders and retro-fit kits to accommodate a CN3 or CN3e mobile computer in either new 6821P/ 6821F mobile printers or existing 6820/6821 models are now shipping.

The holders will also be compatible with the upcoming 6822 mobile printer, to be released in October 2008.

The holders and retro-fit kits will be sold beyond the retirement date of the 6820 and 6821 printer models to accommodate recent and existing customers in their mobile printing applications.

This enhancement extends the life of the 682x Printers Series and verifies our continued commitment to our customers.

Communication between Computer and Printer

- The CN3 holders all use Bluetooth (BT) for communication between CN3 and the 6821.
- The BT module is built into the holder.
- Customer applications that currently use serial connections will need to be modified to use a BT connection.
- The holders can be retrofitted on existing BT or non-BT printers by qualified customers or at Intermec Service Depots. The upgrade instructions can be viewed or downloaded from GSS by entering "6820 Printer Terminal Holder Upgrade" in the "Site Search" field.

In addition to the retro-fit kits, the following configuration utility software and special cable will be needed if upgrading from NPCP to Bluetooth:

- 6820 Printer Configuration Utility for Windows 2000 and XP:
 - P/N 235-145-001
- 6820 Printer Configuration Utility for Windows 95 and 98:
 - P/N 215-815-001
- 6820 programming cable:
 - P/N 226-270-001.

(The programming cable connects the 9-pin DSUB on your PC to the RJ-11 jack on the 6820/6821)

Configurations Available for New Printer Orders

For 6821F

Available Configurations

6821F0016010100	Fixed, Left side holder, right side filler, holder 700 series
6821F0026010100	Fixed, Left side filler, right side holder, holder 700 series
