203-876-001	SR61 Vehicle & Wall Mount Stand
203-877-001	SR61 Hand Free Stand
203-878-001	Desktop Stand

Firmware Updates for New and Existing SR61T Scanners

A new production run of the SR61T is fully underway. Any SR61T with a serial number greater than 126109xxxxx can use the SR61 Release 2 firmware to make the SR61T capable of wand emulation. The [firmware version is 2.02.00.0310 2.03](#), and is downloadable from www.intermec.com.

If your customers wish to upgrade their existing SR61T's (serial numbers lower than 126109xxxxx), please use the Intermec Scanner Upgrade Utility available for free with our EasySet scanner configuration software. The [latest EasySet software](#) version is also downloadable from www.intermec.com.

Important note: The older part numbers of the SR61T (SR61TE0000 and SR61TE0100) cannot be upgraded to support wand emulation. Please use the new part number described above (SR61TE0101) as it is capable of wand emulation in default configuration.

Order Information

Refer to your Intermec price guide for full ordering information including part numbers and pricing. For information on product availability or order status, please contact your Intermec Authorized Distributor or Intermec Customer Service Representative.

If you have any queries about this announcement, please contact your local representative or myself.
